PROFESSIONAL SUMMARY

Senior Software Test Engineer working across risk-based test strategy, C#/.NET automation, web and mobile quality, API and SQL validation, defect triage and release risk. Translates product risk into focused coverage and clear quality signals for technical and non-technical stakeholders. Also builds and operates public web and mobile products, adding direct product, data, privacy and release ownership.

CORE SKILLS

Strategy and delivery

Risk-based testing, test planning, acceptance criteria, release risk, defect triage, mentoring

Data, API and tooling

Microsoft SQL Server, PostgreSQL, Postman, Azure DevOps, Jira, Bamboo, Git, Docker, CI/CD

Automation and quality

C#/.NET, NUnit, Selenium, Appium, Playwright, TestComplete, web and mobile testing

Product engineering

Python, Flask, FastAPI, React, JavaScript, Capacitor, source integrations and production operations

PROFESSIONAL EXPERIENCE

Senior Software Test Engineer

Jul 2026 - present

Acquire Technology Solutions

- Coordinate risk-based quality across delivery by aligning acceptance criteria, test approach and release risk with product and engineering stakeholders.
- Prioritise coverage using product risk, automation and quality signals so testing remains focused on high-impact areas.
- Facilitate defect triage and communicate quality status, dependencies and release trade-offs clearly.
- Review automation code, mentor colleagues and improve test artefacts, handovers and SDLC feedback loops.

Software Test Engineer

2021 - Jun 2026

Acquire Technology Solutions

- Developed and maintained C#/.NET automation and supporting frameworks using NUnit, Selenium, Appium and TestComplete for web and mobile products.
- Validated databases and APIs with Microsoft SQL Server, T-SQL and Postman.
- Investigated complex defects with developers and translated technical findings into actionable evidence.
- Collaborated with Product, Support and Learning teams to address client concerns and improve usability.

SELECTED PRODUCT WORK

Product Owner and Full-Stack Developer

Perth Futsal

2024 - present

- Built and released web, iOS and Android applications for fixtures, results, standings, teams, player records, favourites, notifications and futsal content.
- Own product direction, data ingestion, API and frontend delivery, native releases, privacy controls, administrator operations and production diagnostics.
- Use release checklists, automated regression coverage, staged database rehearsal and production smoke testing to manage iterative delivery.

Independent product development

Aqua Local and Perth Tennis

2026

Built source-aware public-data products for swimming and tennis discovery using Python APIs, React, PostgreSQL, scheduled ingestion, privacy controls and mobile delivery. Aqua Local is live on the App Store.

ADDITIONAL EXPERIENCE

Lawyer

Legal Advice Services, Russia

2017

Drafted and reviewed legal documents, advised clients on compliance and represented matters requiring structured analysis and clear communication under pressure.
