

Philipp Alimov

Senior Software Test Engineer

Test Strategy | Automation | Web & Mobile Quality | Release Risk

Perth, Western Australia | philalimov@gmail.com

linkedin.com/in/philalimov | github.com/Filjo0 | filjo0.github.io

CORE EXPERTISE

- Risk-based test strategy
- Test planning and acceptance criteria
- Release risk and quality signals
- Defect triage and investigation
- Web and mobile quality
- Mentoring and code review

AUTOMATION

Languages and frameworks

C#/.NET, NUnit

Web and mobile

Selenium, Appium, Playwright, TestComplete

DATA & DELIVERY

Data and API

Microsoft SQL Server (T-SQL), PostgreSQL, Postman

Delivery tooling

Azure DevOps, Jira, Bamboo, Git, Docker, CI/CD

Professional Summary

Senior Software Test Engineer working across risk-based test strategy, C#/.NET automation, web and mobile quality, API and SQL validation, defect triage, and release risk. Translates product risk into focused coverage and clear quality signals for technical and non-technical stakeholders. Brings additional product ownership, quality management, business, and legal analysis to delivery decisions.

Professional Experience

Acquire Technology Solutions

Senior Software Test Engineer

Jul 2026 - Present

- Coordinate risk-based quality across delivery by aligning acceptance criteria, test approach, and release risk with product and engineering stakeholders.
- Prioritise coverage using product risk, automation, and quality signals so testing remains focused on high-impact areas.
- Facilitate defect triage and communicate quality status, dependencies, and release trade-offs clearly.
- Review automation code, mentor colleagues, and improve test artefacts, handovers, and SDLC feedback loops.

Software Test Engineer

2021 - Jun 2026

- Developed and maintained automated tests and supporting frameworks in C#/.NET using NUnit, Selenium, Appium, and TestComplete for web and mobile products.
- Validated databases and APIs with Microsoft SQL Server, T-SQL, and Postman.
- Investigated complex defects with developers and translated technical findings into actionable evidence.
- Collaborated with Product, Support, and Learning teams to address client concerns and improve usability.

EDUCATION

Graduate Certificate in Business

Curtin University, 2025

Diploma of Software Development

North Metropolitan TAFE
2020 - 2021
C#/.NET, Python, and SQL

Master's in Quality Management

Tomsk State University, 2017
ISO standards and process management

Bachelor of Laws (LLB)

Tomsk State University
2011 - 2017

PROFESSIONAL DEVELOPMENT

Hugging Face

AI Agents Fundamentals,
2025

Acquire Technology

GIM Suite Professional and Practitioner

Stepik

Test Automation Using Python and Selenium

LANGUAGES

English: Full professional

Russian: Native

Spanish: Elementary

Selected Technical Project

FUTSL

Product Owner & Full-Stack Developer

2024 - Present

Web & iOS · Android release preparation

- Built and released web and iOS applications for fixtures, results, standings, teams, player records, favourites, notifications, and futsal content, with Android release preparation.
- Own the roadmap and release cadence using feedback from players, coaches, supporters, and administrators.
- Apply release checklists, automated regression coverage, staged database rehearsal, and production smoke testing to keep iterative updates stable.

Additional Experience

Legal Advice Services, Russia

Lawyer

2017

- Drafted and reviewed legal documents, advised clients on compliance, and represented matters requiring structured analysis and clear communication under pressure.
